Embed sustainability across your entire organisation with Rewrite online training.

The race to net zero is on - education is the first step towards environmental sustainability.

"Rewrite's informative and inspiring approach is ideal for all of our teams. It is easy to follow and we all enjoyed the content presentation which is engaging and, at times, fun in style."

Massine Amri, PE Vice-President - Energy Transition, Tikehau Capital

"Pitched at exactly the right level"

"Awesome"

"Extremely engaging"

"Perfect mix of science&emotion"

Sustainability 101 - one hour programme

6 short lessons

Video, interactive diagrams,
business examples,
and quizzes

On-demand, self-guided

Distils complex subject
matter into bite-sized
learning

Curated especially for business

Bespoke / own-branded version available

How can sustainability education benefit your company?

- Your employees will feel informed, inspired and hopeful about the future, building responsibility and responsiveness at every level within your business.
- They will understand the risks and opportunities associated with climate change in a business context.
- All your teams will have the knowledge to think sustainably and devise solutions and new ways of doing business.
- Signal your sustainability commitment to your employees, customers, suppliers and investors.

"Training our teams on sustainability has been instrumental in helping us on our path to Net Zero. The programme is a brilliant way to educate, motivate and involve everyone on the journey."

Sinéad Darcy, Sustainability Project Manager, Mace Promotions

Sustainability 101 content

Lesson 1: What is climate change - the carbon cycle, GHGs, the impact of climate change and the biodiversity crisis.

Lesson 2: What do we need to do - net zero, carbon footprints, Scope emissions, setting targets, The Paris Agreement, and developing a strategy.

Lesson 3: Transforming Energy - how can we halve emissions from our use of energy by 2030.

Lesson 4: Revolutionising Transport - how can we halve emissions in the transport sector by 2030.

Lesson 5: Redesigning Industry - the circular economy, how businesses are successfully adopting new business models.

Lesson 6: Rethinking Food, Agriculture and Land Use - how we can feed the global population AND reduce GHG emissions.

"I rolled out Rewrite so every employee would understand and contribute to our net zero strategy. My teams felt the training was excellent, all the solutions and business examples were really interesting and the interactivity made it easy to digest and understand."

Neil Menzies, Sustainability Director, Hibernia REIT

Rewrite Education is part of the CoolPlanet Group, a family of companies that help global business reduce emissions as fast as possible.
